

‘GREENER WALDRINGFIELD’ notes for Annual Parish Meeting

This is a (so far very small) group experimenting with ways to encourage a greener village through community action.

So far we have set up a lift-share group that can be accessed through Waldringfielders, set up a communal buying group for bulk orders from Suma (which specialises in ethically sourced groceries) and run a couple of bike work-shops to try to encourage cycling.

We are currently devising a Community Composting scheme with the ultimate aim of trying to reduce the need for brown bin collection to zero – over a couple of years. The first step will be dealing with food waste – please talk to us if you are interested.

In October we plan another green day – like the ‘Energy and Community’ day in 2011 – only better!
